**DOB:** Aug 09, 2000 ◇ **Nationality:** India ◇ **Gender:** Male ◇ Github ◇ LinkedIn ◇ Portfolio

## SUMMARY

Frontend Software Engineer with nearly 2 years of experience building production-ready web applications using Next.js, React.js, TypeScript, Tailwind CSS, and Zustand. Experienced in developing reusable UI components, integrating REST APIs, implementing authentication and role-based access control, and optimizing application performance. Contributed to Klakar and DiziVizi, delivering responsive, scalable frontend features with a focus on maintainable code, accessibility, SEO, and user experience. Passionate about solving real-world problems and building reliable web applications using modern frontend technologies and engineering best practices.

## WORK EXPERIENCE

**Frontend Software Engineer** Aug '25 — Present
Riverhead Software Pvt. Ltd. Gurugram, Haryana, India
Building and scaling frontend applications for Klakar and DiziVizi while collaborating with cross-functional teams to deliver high-quality web experiences throughout the product development lifecycle.

- Built and enhanced core frontend features for startup products, contributing from initial development through production releases.
- Delivered production-ready frontend features for scalable web applications using modern frontend technologies.
- Built reusable components, shared modules, and dynamic user interfaces to improve code maintainability and development efficiency.
- Integrated REST APIs and implemented authentication, protected routes, and role-based access control for secure web applications.
- Improved application performance through frontend optimization, responsive design improvements, and accessibility best practices.
- Collaborated across frontend, backend, QA, and product teams throughout the complete feature lifecycle, contributing to testing, debugging, deployment support, and production releases.
- Contributed to code reviews, production issue resolution, feature planning, and continuous code improvements while following modern engineering best practices.

**Front End Developer** Feb '25 — Aug '25
Recon Aesthetics Private Limited Gurgaon, India
Developed and maintained responsive, scalable, and high-performance web applications using React.js and Next.js, ensuring a seamless user experience across modern browsers and devices.

- Developed responsive and user-friendly web applications using React.js and Next.js, ensuring a consistent experience across modern browsers and devices.
- Translated Figma designs into pixel-perfect, reusable frontend components while maintaining design consistency and code quality.
- Integrated REST APIs and collaborated with backend developers to deliver dynamic and interactive application features.
- Worked closely with UI/UX designers and QA teams to implement new features, resolve UI issues, and improve overall usability.
- Optimized frontend performance through code refactoring, component reusability, and responsive design best practices.

## SKILLS

**Programming Languages:** JavaScript (ES6+), TypeScript
**Frontend:** Next.js, React.js, HTML + HTML5, CSS3, Tailwind CSS, Responsive Web Design, Responsive Design Testing, Cross-Browser Compatibility
**State Management:** Zustand, Redux Toolkit, MobX, React Context API
**UI Libraries:** shadcn/ui, Radix UI
**API Integration:** REST APIs, REST API Testing, Java APIs, Axios, Fetch API
**Version Control:** Git (Version Control System), GitHub
**Development Tools:** VS Code, IntelliJ IDEA, Postman Software, Swagger UI, Chrome DevTools, Figma (Design Software)
**Interests** Frontend Development, UI/UX Design, Web Performance, Open Source, Continuous Learning
**Languages** English, Hindi (Native)

## PROJECTS

**Klakar**, Riverhead Software Pvt. Ltd. Link
Aug '25 — Present
Gurugram, Haryana, India

- Developed and enhanced scalable frontend features for artist-focused platform modules, including profiles, events, jobs, products, and AI-powered experiences.
- Built reusable components, dynamic forms, and shared UI modules using modern frontend technologies to improve maintainability and development efficiency.
- Implemented authentication, protected routes, role-based access control, and REST API integrations to deliver secure and scalable user workflows.
- Improved application performance, SEO, accessibility, and responsive design while collaborating with cross-functional teams to deliver production-ready features and continuous product enhancements.
- Contributed to code reviews, debugging, production issue resolution, and feature planning in a fast-paced startup environment.

**DiziVizi**, Riverhead Software Pvt. Ltd. Link
Apr '26 — Present
Gurugram, Haryana, India

- Developed interactive and map-based frontend features for a location-driven video discovery platform using Next.js, React.js, TypeScript, and Tailwind CSS.
- Built reusable UI components, responsive layouts, and dynamic user interfaces to improve maintainability and deliver a consistent experience across devices.
- Integrated REST APIs to support video discovery, location-based content, search, filtering, and other interactive platform features.
- Improved frontend performance, accessibility, SEO, and responsive design while contributing to continuous product enhancements.
- Collaborated with cross-functional teams to deliver production-ready features, resolve issues, and support continuous product releases.

## EDUCATION

**Bachelor of Technology (B.Tech.) in Computer Science and Engineering (CSE)**, Jun '23 — Jun '26
All Saints' College of Technology
Bhopal, Madhya Pradesh, India

## CERTIFICATIONS

**MERN Full Stack Development**, Ducat Education — Aug '24

**Frontend Developer (React), HackerRank**, HackerRank — Apr '25

**AI Fluency: Framework & Foundations**, Anthropic — Mar '26
